

Talk for Confluence

✓ **For SERVER clients only:** despite new server apps being no longer available on Atlassian Marketplace, you still have an opportunity to [buy](#) our app for your Confluence Server and enjoy its latest version! To get it, you need to buy or [generate a trial](#) Data Center license on Atlassian Marketplace and install it on your Confluence Server instance as they are compatible, and all functionality will be available.

i So far, our Talk app is only available for **Data Center**. We seek to meet your needs in Cloud as well. To do that, we need to know must-have features for you in Cloud in terms of communication. Help us speed up the **shift to Cloud**. [Book a meeting](#) with our Product Manager to Talk about your use case.

Talk - Advanced Inline Comments is the onfluence app that enables you to insert inline comments and suggestions on Confluence pages.

Suggestions let users propose changes and have page owners decide whether to accept or reject them.

Inline Comments allow to add comments next to the specific lines in the text. It's a more contextual way of interacting on the Confluence pages. You can add Talk inline comments on:

- Text lines
- End of text paragraphs
- Images
- Headings
- Tables
- Items of numbered, bullet and task lists
- [Include Page](#) or [Excerpt Include](#)
- Empty lines
