

Integrating with Release Hub

Release of a product version depends on different aspects. As a release engineer or product manager, you need to ensure that everything is complete before you can ship another version of your software product to your customers.

You need to check a bunch of things whether issues are complete, program code is committed, reviewed, and, finally, merged, builds have passed all the necessary tests, and so on. The Release Hub in Jira Software can help you to track the development progress and see when it is time to release a version.

ID	Key	Summary	Assignee	Status	Development
1	SACF-291	FE: The root folder was removed, but its record remains in the database...	Alexander Ouyang...	DONE	1 commit
2	SACF-295	FE: Display labels for documents	Timothy Kototcho	DONE	3 commits
3	SACF-296	FE: Fetching labels for the document	Timothy Kototcho	DONE	1 commit
4	SACF-297	FE: Labels form to manage labels for the document - Build compon...	Timothy Kototcho	DONE	1 commit
5	SACF-298	FE:FE: Auto-completion of labels for documents in the Labels form	Timothy Kototcho	DONE

8	SACF-302	FE:BE: Generation of the link to transition to Advanced Search by a L...	Timothy Kototcho	DONE	3 commits
9	SACF-299	FE: Showing the warning for the label containing illegal characters	Timothy Kototcho	DONE	

Viewing the build information for an issue

1. On the Jira navigation sidebar, select **Release Hub** and choose the appropriate version.
2. Select the appropriate tab with issues grouped by status.
3. Locate the issue you are interested in.
4. Click the icon (🚨 or ✅) located in the right part of the table.

In the opened form, you can view the relevant development information, such as build configuration, status of the latest build, test results and date of build completion. Right from this form, you can quickly transition to the related section in TeamCity.

SACF-300: 2 builds

Deployments :: Confluence :: Smart Attachments

Build Configuration	Latest build	Result	Completed
confluence.atlassian.com@master	🚨	Passed in 45 seconds	14/May/19

Smart Attachments for Confluence

Build Configuration	Latest build	Result	Completed
Master@master	✅ #492	Passed in 43 seconds	14/May/19
