

# Viewing Builds within Issues

While viewing a specific issue, you can find out a list of builds that relate to this issue. You can see the list of builds on the TeamCity tab. The amount of information about the build is the same as in the project view. You can quickly transition to TeamCity and view details by clicking the project, branch and build configuration name, or the build number.

You can filter builds by one of the following parameters:

- Status
- Build Period
- Agent
- Project

 If you use Jira Cloud with the new issue view, you may need to select the TeamCity tab to display in the issue.

The screenshot shows the TeamCity interface with a list of builds. Callouts highlight various features:

- CLICK TO VIEW BUILD CONFIGURATION IN TEAMCITY**: Points to the build configuration name in the first row.
- FILTER BUILDS BY STATUS, PERIOD, AGENT, AND PROJECT**: Points to the filter dropdown menu.
- CLICK TO VIEW COMMIT LOG**: Points to the commit log link in the second row.
- CLICK TO VIEW BUILD RESULTS**: Points to the build results link in the third row.
