Privacy Policy

**General Information**

Table Filter and Charts for Confluence uses the Google Analytics engine to collect anonymous user interactions with the add-on and parameters specific to bundled macros on Confluence instances. Find the list of key events and information that we track below.

**Why Do We Need This Data**

This anonymous data is used for:

- Analytical and statistical purposes
- Understanding your interaction with the add-on
- Improvement and development of the add-on.

**What Do We Track**

We track only information that pertains to our add-on (such as the event of filter management) and some information related to the size of your tables and macros used to generate the table data.

The key events and information that we track:

- source of table data and size of tables (contents of tables is not tracked)
- used combinations of the macros for table processing
- usage of the macros parameters (for example, date format, cell value delimiter, aggregation by date, interpolation type, transposing tables, excerpt source, etc.)
- activation or deactivation of the macros options
- events of exporting table data to CSV, PDF or Word

We do not track, store, or otherwise process any personal data that may reveal or compromise your identity or results of your work.

**Data Storage**

All data about outputs of the add-on on Confluence pages are stored in Google Analytics on their servers. Third parties and services do not have access to the account storing the tracking information. Access to the Google Analytics account is available only to StiltSoft and will not be shared with anyone else. We don't track and store table contents and any personal data.

**Disclosure**

StiltSoft company will not disclose the collected data about add-on outputs/openings under any circumstances.

**Questions**

Any questions about this Privacy Policy should be addressed to tech-support@stiltsoft.com.
