

# No Email Storm

## What is this add-on for?

The app is installed, but you do not see the buttons. See how to [enable the app for your account or for user groups](#).

Confluence sends email and Workbox notifications to page watchers about any changes made on these pages.

If you don't want to notify your colleagues about minor corrections, you should always remember to uncheck the **Notify watchers** option in Confluence editor.

comment, blog...

### Space contributors

Contributors | order = update | limit = 5 ...

Ready to go         Notify watchers    Preview    **Update**    Close

The issue here is that a lot of people forget to do that, which results in tons of useless 'spamming' emails.

The No Email Storm app replaces the **Notify watchers** option with the **Update & Notify** button placed next to the native **Update** button. So the key question is only which of the two buttons to choose.

comment, blog...

### Space contributors

Contributors | order = update | limit = 5 ...

Ready to go        Preview    **Update**    Update & Notify    Close

Ready to go        Preview    Update    **Update & Notify**    Close

After mentioning users on Confluence pages and clicking the Save button the add-on also blocks email notifications sent to the mentioned users.

## How to install?

1. Install the No Email Storm extension in **Confluence Admin > Manage Add-ons**.
2. Enable the extension for yourself in **Profile - Settings**.

3. Confluence administrators can enable the add-on for specific user groups. Navigate to **Confluence Admin > Users & Security > No Email Storm**.
4. The Confluence administrator should enter one or multiple user groups, which the add-on is enabled for.
5. Here the administrator can also select which button is prominent - either **Update** or **Update & Notify**.

## No Email Storm Settings

Here you can select the button that is prominent in the visual editor and define the user groups that can use No Email Storm add-on.

## Global Button Configuration

Select the prominent button

Update

Update & Notify

The selected button is used as prominent and the key combination "Ctrl + S" is mapped to it.

## Add-on Activation for User Groups

Add Group

of which No Email Storm add-on is enabled.

Name	Operations
confluence-administrators	Delete
confluence-users	Delete

1. Configuration set by the administrator will override the settings defined by the user.
2. Selection of the prominent button also affects the key combination 'Ctrl + S'. This key combination is automatically re-mapped to the prominent button.

## Compatibility

The following table explains which extension version you should install for your Confluence.

Confluence Version	Extension Version	Speakeasy Required
3.x	1.0.0	Yes
4.0 - 4.2	1.1.0	Yes
4.3 - 5.x	2.0.0+	No
5.2.3 - 5.8.x	2.1.0	No
5.6.0 - 6.8.2	2.2.0	No

## How to show the Update & Notify button only?

From [No Email Storm 2.2.2](#) you can add the 'nes-notify' label to the page. This will hide the Update button, and the Update & Notify button will only remain.
