Privacy Policy

StiltSoft has adopted a general privacy policy that applies to all our apps, including Table Filter and Charts for Confluence. Please, review both privacy policies prior to using the app.

Information Collected Through Google Analytics

Table Filter and Charts for Confluence (the "App") uses Google Analytics to collect anonymous information about certain user interactions with the App.

By using Google Analytics we track only information that pertains to the App (such as event of filter management) and certain information related to the size of tables and macros used to generate table data.

For example, we collect the following information:

- Source of table data and size of tables (content of tables is not tracked)
- Combinations of macros used for table processing
- Usage of the macros parameters (for example, date format, cell value delimiter, aggregation by date, interpolation type, transposing tables, excerpt source, etc.)
- Activation or deactivation of the macros options
- Instances of exporting table data to CSV, PDF, or Word.

We do not track, store, or otherwise process any personal data or any content of the tables.

Error Tracking

The App uses Sentry.io, an error monitoring tool that helps us discover, triage, and prioritize App errors in real-time. Sentry.io collects and stores the following data:

- Information about the page on which the error occurred (the page URL (including query parameters), description of the user’s actions on the page that preceded the error (places the user clicked, URLs of requests initiated from the page), and stack trace); and
- Information about the user’s environment (IP address, browser type and version, and operating system type and version).

Please, see Sentry.io privacy policy and "Security and Compliance" page for more details.

Why Do We Need This Data

This anonymous data is used for:

- Analytical and statistical purposes
- Understanding your interaction with the App
- Improvement and development of our apps.

Data Storage

All data collected using Google Analytics and Sentry.io is stored on servers of the respective service provider. Third parties do not have access to our Google and Sentry.io accounts.

Questions

Any questions about this Privacy Policy could be addressed to tech-support@stiltsoft.com.
