

# Search Discussions

You can search for pages with Talk discussions using the Confluence Search:

- [Confluence Search field in the header](#)
- [Confluence Search Screen](#)

## Confluence Search field in the header

Use the Confluence **Search field in the header** to enter your query.

The search queries syntax is the following:

Query	Search	Examples
<code>macroName:talk</code>	Find all Confluence pages with at least one Talk macro	
<code>talk:"some text"</code>	By text in discussions	<code>talk:release</code> <code>talk:"do that ASAP"</code>
<code>talkUser:"User Name"</code>	By commenter (by user name, first name, last name or full name)	<code>talkUser:asmith</code> <code>talkUser:Alex</code> <code>talkUser:Smith</code> <code>talkUser:"Alex Smith"</code>
<code>talkUpdated:[yyyymmdd TO yyyymmdd]</code>	By talk update date range	<code>talkUpdated:[20141201 TO 20150201]</code>
<code>macroName:talk</code>	For Talk macro	<code>macroName:talk</code>
<code>talk:"some text" AND talkUpdated:[yyyymmdd TO yyyymmdd]</code> <code>talk:"text 1" OR talk:"text 2"</code> <code>talkUser:"User Name 1" NOT talkUser:"User Name 2"</code> <i>(variations are possible)</i>	By several terms	<code>talk:"do that ASAP" AND talkUpdated:[20141201 TO 20150201]</code> <code>talk:change OR talk:modify</code> <code>talkUser:asmith NOT talkUser:jclarks</code>

You can use [Confluence Search Syntax](#) to refine your search.  
Make sure to include your query in double quotes if it contains spaces.

## Confluence Search Screen

Available in Confluence 5.9 and above starting from the Talk version 3.3.0.

Instead of using search queries you can search Talk discussions by adding filters on the **Confluence search screen**.

[Add a filter](#)

*Tip: something went wrong with your search. Please provide text in the search box above.*

**To use this searching option:**

1. go to the Confluence search screen
2. click 'Add a filter' on the bottom of the sidebar
3. select a suitable Talk filter

**Available filters:**

- **Talk text** - searches by text in discussions
- **Talk updated** - searches by talk update time
- **Talk user** - searches by commenter (by user name, first name, last name or full name)
