

Adding Images to Comments

You can [add links](#) to images in Talk comments. In addition to that, it is possible to **drag-and-drop an image from your computer** into a comment field.

The screenshot shows the Moodle interface. At the top, there is a navigation bar with 'Spaces', 'People', 'Contacts', 'Calendars', and 'Create'. Below this, the page title is 'Set up Quizzes'. The main content area contains text about creating quizzes and a list of settings: 'Pass target to 16 questions', 'Time limit to 10 minutes', 'Number of attempts to 2', and 'Enables Results after each question'. Below the text is a quiz titled 'Workplace Safety' with a progress bar and a question: 'Which of the following should you NOT do when lowering a load?'. The options are: 'Twist your body', 'Keep the load close to your body', 'Bend your knees', and 'All of the above'. A comment dialog box is open on the right, showing the user's name 'Katerina Kolina' and the text 'Let's add this screenshot here'. A green callout bubble points to the dialog box with the text 'Drag-and-drop an image to add it to a comment'.

When you do that, an image will be attached to the page and shown in the comment after saving it.

This screenshot shows the same Moodle page as the previous one, but the comment dialog box is now updated. The text 'Let's add this screenshot here' is followed by a thumbnail of the 'Workplace Safety' quiz question. Below the thumbnail are 'Edit' and 'Delete' buttons. At the bottom of the dialog box is a text input field labeled 'Write a comment...'. A green arrow points from the text 'an image will be attached to the page and shown in the comment after saving it' to the thumbnail in the dialog box.
