Documents and Revisions

When you work continuously with documents on adding, updating or correcting their contents, you may need a capability to store their revisions in some place and quickly share with other users. JIRA is a right place to upload your documents and store them within issues associated with the project you are working on. All users can always get access to your documents, and you can always track modifications made in each document.

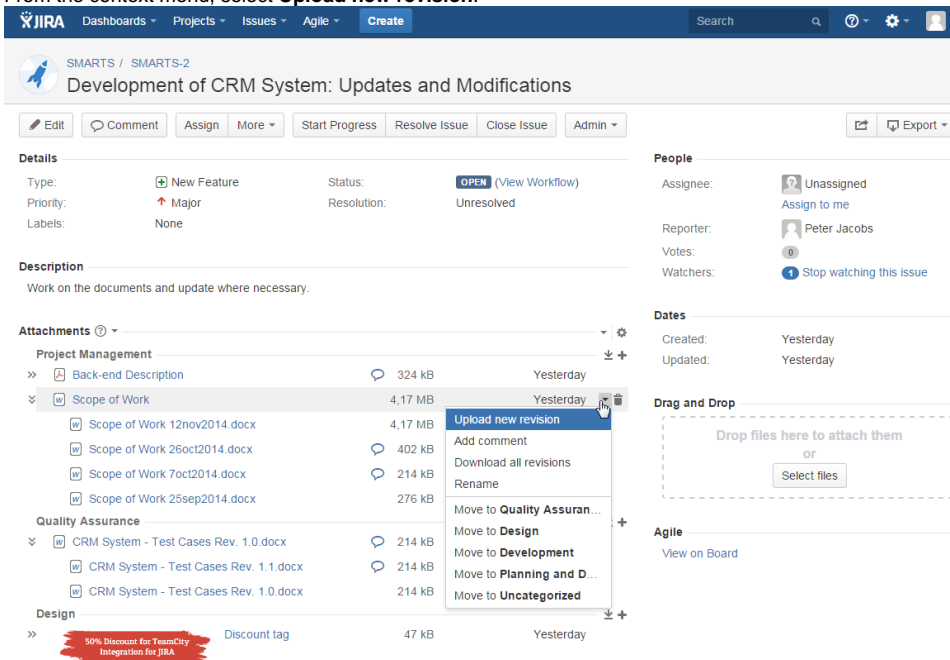

Smart Attachments add-on provides you with the three options of attaching revisions to documents:

1. You can upload a file with the same name which the app will automatically map to the existing document.
2. You can upload a new file and attach it as a revision to the required document.
3. You can select the already uploaded file and convert it into the document revision.

Uploading New Document Revisions

You can load revisions for any document or file attached to JIRA issues.

1. On the list with attachments, locate the appropriate document or file.
2. Point to this file and click the down arrow icon.
3. From the context menu, select **Upload new revision**.

The screenshot shows the JIRA issue page for "Development of CRM System: Updates and Modifications". The issue is in the "OPEN" status. The "Attachments" section is expanded, showing a list of files. A context menu is open over the "Scope of Work" file (4.17 MB), with the "Upload new revision" option selected. The menu also includes options like "Add comment", "Download all revisions", "Rename", and "Move to Quality Assurance".

Attachment	Size	Created
Back-end Description	324 kB	Yesterday
Scope of Work	4.17 MB	Yesterday
Scope of Work 12nov2014.docx	4.17 MB	
Scope of Work 26oct2014.docx	402 kB	
Scope of Work 7oct2014.docx	214 kB	
Scope of Work 25sep2014.docx	276 kB	
CRM System - Test Cases Rev. 1.0.docx	214 kB	
CRM System - Test Cases Rev. 1.1.docx	214 kB	
CRM System - Test Cases Rev. 1.0.docx	214 kB	
Discount tag	47 kB	Yesterday

4. In the **Attach Files** form, select the appropriate file and enter the generic document name. By default, name of the initial document is used.

The maximum file upload size is 2048,00 MB.

Comment

5. Click **Attach**.

6. The new file revision will be uploaded and mapped to the document.

i By default, the add-on uses name of the first file revision as the generic document name, This name is preserved when you upload new revisions, but when you click this document name you will download the latest revision which may differ from the initial one.

We strongly recommend you to use the generic document names without any revisions or dates for better visual perception on the list with attachments. Revision names are shown as initial names of the uploaded file revisions and may contain dates or revision number.
