

Plana - Agile Planner for Confluence

Boards and to-do lists to manage tasks and projects. Add on any page. Update cards and lists in View.

Plana - Agile Planner for Confluence Cloud allows you to create **boards** and **lists** on Confluence pages to manage your personal and team tasks, projects and initiatives.

Use cases

-  **Remote Meetings** (daily, weekly, one-on-one) – animated boards for meeting questions, notes, and actions
-  **Team Work** – shared dashboards to enable each team to stay at the top of the game
-  **Project Planning** – agile approach for your roadmaps, backlogs, sprints, and resource management
-  **Personal Task Tracking** – simple planner with your own to-dos right where you need it
-  **Customer Interviews** – reusable templates to streamline customer development
-  **Surveys and Polls** – plan events, gather procurement requests via adjusted lists

Key benefits

- **Viewing flexibility** – switch between List and Board views
- **Designed for prioritizing and organizing** – split tasks in groups and don't get lost in dozens of checkboxes
- **No need to click 'Edit'** – Move and update list and board items without editing pages
- **See what's done** – Completed tasks are checked and stand out from the others
