How to use Table Filter macro

Table Filter is one of the macros bundled in the Table Filter and Charts for Confluence app. The macro allows you:

- To filter all kinds of table data
- To calculate totals and visualize table data
- To sort tables, freeze rows and columns and apply other table viewing options

How to get started?

Try live filtration in table headers (Cloud, Data Center, Server):

Filter table data on the fly in table headers:

Enable live filtration in Cloud

In Data Center (Server) it's enabled automatically

If you want to display the filtration panel, follow these steps:

Step 1. Add the macro to your table. Choose the handy way to do this:

In the page **view** mode
