Data indexation loops on large data amounts

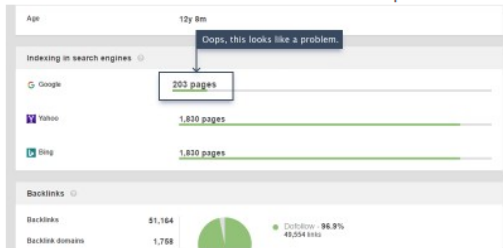

Functionality, Performance Optimization

Paragraph **B** *I* U ~~ABC~~ **A**

-

-

Hi,
I am constantly experiencing problems with indexation of large data amounts.
The screenshot illustrates that the indexation loops in some situations. Please advise on this.

The new version of add-on includes the following features:

- Added the forum name into the email subject for event notifications.
- Added a capability to pre-define the ticket subject through the URL query parameter.

Fixed in this release

- Resolved the issue with the incorrect conversion of RGB colors to HEX format in tickets created by email.
- Resolved the issue with the Mailboxes page auto-resizing.
- Resolved the issue with authentication in Customer Case using JIRA Service Desk portal-only accounts.
