

Customer Case - 3/20/2015

New in this release

Added support for a visual text editor when you add ideas and leave comments.

Now you can quickly and easily apply the required text formatting to your idea descriptions and comments.

Add a capability to use the visual editor for basic formatting of the idea description, such as:

- use **bold**, *italic*, +underline +or ~~strikethrough~~ text
- pick the appropriate color for highlighting

1. create bulleted and numbered lists
2. insert links
