

How to combine the macros

On this page you will find the following macro combinations:

- [Table Filter & Chart from Table](#)
- [Table Filter & Pivot Table](#)
- [Table Filter & Pivot Table & Chart from Table](#)

Read more:

- [Combining of Table Excerpt/Table Excerpt Include with Table Filter](#)

Table Filter & Chart from Table

1. Create a table or add the macro outputting the table data or include the excerpted table with data values.
2. [Insert the Table filter macro](#) and place the table (the macro outputting the table data or the Table Excerpt Include macro) within the macro.
3. Add the filters and configure the filtration parameters.
4. [Insert the Chart from Table macro](#).
5. Place the Table filter macro with the table inside the Chart from Table macro.
6. Configure the parameters of the chart.
7. Save the page.
8. Change the filtration criteria. Filtration will be automatically applied to the data table and the chart will be automatically updated.
9. Change the chart parameters if needed.
