

Cloud and Server versions comparison

 Learn more on [how to migrate from the Server \(Data Center\) to Cloud version](#)

Because of the Confluence Cloud app's architecture and technical limitations, there are multiple minor differences in functionality between Data Center (Server) and Cloud versions of the app:

Macros / Feature	Data Center (Server) version	Cloud version
The Table Filter macro	✓	✓ (except the Copy filter URL option)
The Pivot Table macro	✓	✓
The Chart from Table macro	✓	✓
The Table Transformer macro	✓	✓
The Table Excerpt macro	✓	✓
The Table Excerpt Include macro	✓	✓ (except the Output cached results option)
The Table from CSV macro	✓	✓
The Table from JSON macro	✓	✓
The Table Spreadsheet macro	✓	✓
The Table Toolbox macro	✗	✓
Combining the macros included in the app	✓	✓ (please find additional information here: the Table Toolbox macro)
Combining the macros included in the app with the built-in Confluence macros outputting tables	✓	✓
In-app features that require integration with the Confluence default functionality: <ul style="list-style-type: none"> Adding the macros through the action icon on the editor pane Copy table button on the editor's panel Exporting the whole page, page tree or space with the applied macros Removing all the macros from Confluence pages (Add-on Macro Cleanup) 	✓	✗ (due to the Confluence Cloud app's architecture and technical limitations)
Interactions with third-party macros and apps: <ul style="list-style-type: none"> Combining the macros included in the app with the third-party macros outputting tables 	✓	✗ (due to the Confluence Cloud app's architecture and technical limitations)
