Talk for Confluence 3.0.2

Fixed in this release

- Fixed a compatibility issue with the fixed page header in Confluence 5.9. Talk comments clouds were not always rendered correctly.
- Fixed a compatibility issue with Confluence 5.9. Talk navigation arrows were displayed too far from the scroll bar.
- Fixed the bug that occurred when adding a link to the text fragment that contained the Talk macro. It caused the link not being displayed in the view mode sometimes.
- Made one of error messages that is displayed when it is not possible to insert a Talk comment by selecting a text fragment clearer and more user friendly.
- Fixed the bug that occurred when adding a Talk comment by selecting a text fragment. It caused the Talk 'Enable adding of discussions' option getting enabled if it was disabled before adding a Talk comment.
