

# TeamCity Integration for JIRA 2.2.0

## New in this release

Added a capability to remotely trigger builds on TeamCity server from JIRA.

Now you can instantly and directly run builds while viewing JIRA issues. You need to add a [custom field](#) into the related screens and set its configuration. Then you can remotely [run builds in TeamCity from JIRA](#) and [view history of builds](#) that were run from JIRA.

The screenshot displays a JIRA issue page for 'TeamCity Integration for JIRA / JTC-143'. The page header includes navigation tabs: Dashboards, Projects, Issues, Boards, and a Create button. The issue title is 'Add a capability to run builds in TeamCity from JIRA'. Below the title are buttons for Edit, Comment, Assign, More, In Progress, In Review, and Workflow. The 'Details' section shows the following information:

|                    |                               |                |                             |
|--------------------|-------------------------------|----------------|-----------------------------|
| Type:              | + New Feature                 | Status:        | IN PROGRESS (View Workflow) |
| Priority:          | ✓ Minor                       | Resolution:    | Unresolved                  |
| Affects Version/s: | None                          | Fix Version/s: | 2.2.0                       |
| Labels:            | None                          |                |                             |
| TeamCity Build:    | Trigger build or View history |                |                             |

The 'Description' section contains the text: 'Add a capability to remotely run builds in TeamCity while viewing JIRA issues.' The 'Attachments' section shows two video files:

| Attachment Name         | Size   | Date      | Time    |
|-------------------------|--------|-----------|---------|
| 6-9-2015 4-18-26 PM.mp4 | 857 kB | 09/Jun/15 | 5:02 PM |
| 6-9-2015 4-36-24 PM.mp4 | 713 kB | 09/Jun/15 | 5:05 PM |

A large blue callout box with white text reads: 'Remotely trigger builds in TeamCity from JIRA'.

The new version of add-on also includes the following features:

- Added display of the TeamCity tab in Service Desk projects.

## Fixed in this release

- Resolved the issue with the continuously refreshed data when opening the TeamCity tab with the expired license for the add-on.
