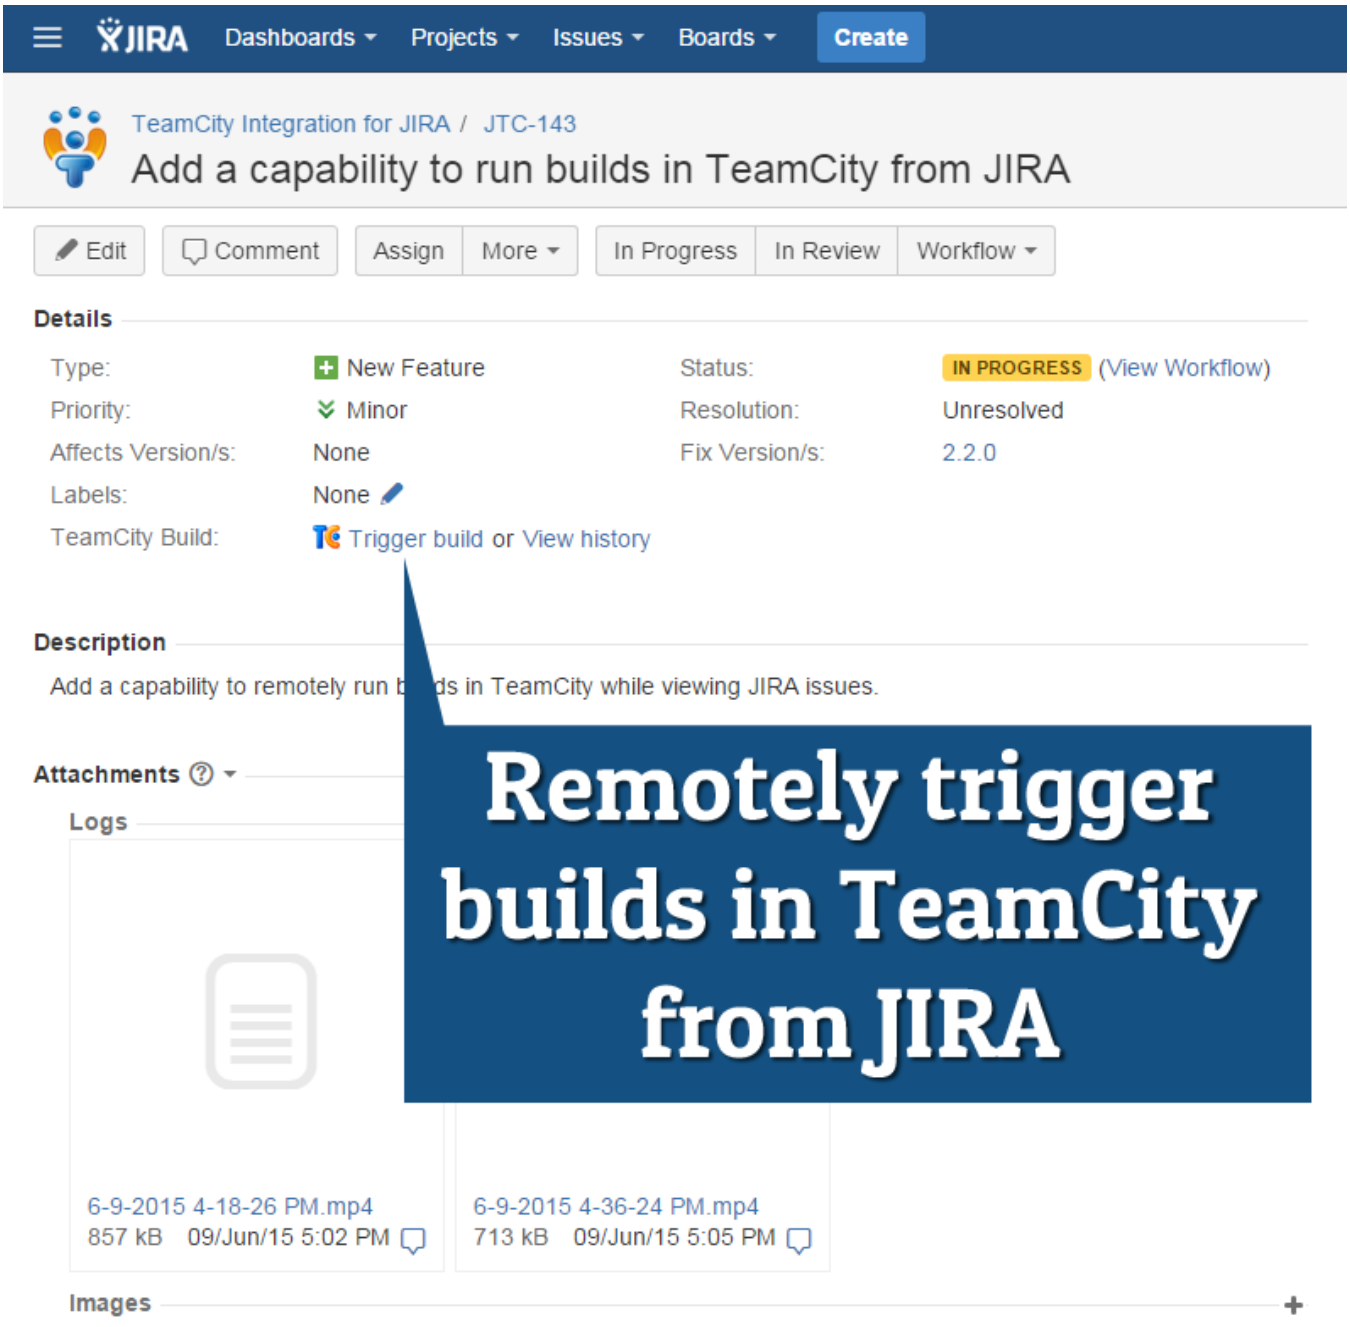
TeamCity Integration for JIRA 2.2.0

New in this release

Added a capability to remotely trigger builds on TeamCity server from JIRA.

Now you can instantly and directly run builds while viewing JIRA issues.You need to add a custom field into the related screens and set its configuration. Then you can remotely run builds in TeamCity from JIRA and view history of builds that were run from JIRA.



The new version of add-on also includes the following features:

- Added display of the TeamCity tab in Service Desk projects.

Fixed in this release

- Resolved the issue with the continuously refreshed data when opening the TeamCity tab with the expired license for the add-on.
