

TeamCity Integration 1/28/2016

With the release of TeamCity Integration for JIRA Cloud you can quickly and easily fetch TeamCity build data. You can further use this data in JIRA Cloud for viewing status of builds and the list of changes for each JIRA issue.

+ Add TeamCity

Here you can view the list of TeamCity servers that the add-on fetches build data from. At first, please add a TeamCity server and wait for a bit until your data is being indexed. Once it is complete, open the project and locate the TeamCity tab where all your build data will be displayed. For the details on using or configuring the add-on, see our [documentation](#).

Name	TeamCity URL	Version	Actions
StiltSoft Teamcity	http://teamcity.stiltsoft.com	9.1 (build 36973)	Edit · Delete
JetBrains TC	https://teamcity.jetbrains.com	9.1.6 (build 37452)	Edit · Delete
TeamCity Production	http://jtc-teamcity-big.stiltsoft.com	9.0.3 (build 32334)	Edit · Delete

Setup of connection to TeamCity server requires entry of the server address and credentials of the TeamCity user with sufficient permissions.

Add TeamCity Server

Name*

Enter name of TeamCity server

URL*

Enter URL of TeamCity server. For example https://teamcity.jetbrains.com

Username*

Enter the username having access to TeamCity server

Password*

Enter the password to access TeamCity server
