

# TeamCity Integration 2/8/2016

## New in this release

The new version of add-on includes the following features:

- Added display of the message '*No associated builds are found*' for issues that were not referenced in VCS comments for commits in TeamCity.
- Added output of the information message about operation status when deleting a connection to TeamCity server.
- Added output of the confirmation form when launching re-indexation of build data in TeamCity,

## Fixed in this release

- Resolved the issue with duplication of indexation tasks for one TeamCity server.
- Resolved the issue with showing Error 500 when attempting to verify empty parameters of the connection to TeamCity server.
- Corrected the mechanism of launching initial build data indexation after setup of the connection to TeamCity server.
