

Talk for Confluence 3.1.2

Fixed in this release

- Fixed the compatibility issue with Confluence native inline comments. The issue caused errors when saving replies in Confluence native inline comments.
- Sometimes new replies were duplicated in Talk discussions.
- The sidebar with talks sometimes disappeared after resolving a talk in the editor.
- When pasting text in the Talk reply field, the heights of the field was not always adjusting to the number of lines of inserted text.
- Fixed the issue with wrong positioning of talks when they are added inside a header cell of a table.
