

Table Filter and Charts 3.5.1

New in this release

- Enhanced the quality of images within tables exported to PDF files.

Fixed in this release

- Resolved the issue with exporting tables containing images stored on servers with Access-Control-Allow-Origin security.
- Resolved the issue with the non-working automatic row numbering in tables generated by Page Properties Report macro.
- Resolved the issue with the incorrect operation of the automatic row numbering when using the default sorting or after the manual sorting of table data.
- Increased the compatibility with Internet Explorer 8.
