

Table Filter and Charts 3.6.4

New in this release

- Added a capability to dynamically set the today's date in the Date Range filter for filtration.

Fixed in this release

- Resolved the issue with export of the table with icons generated by JIRA Issue macro to PDF file.
- Resolved the issue with insertion of the add-on macros from the editor pane if a table contains statuses.
- Resolved the issue with Internet Explorer hang-up when enabling automatic row numeration for the table within the Table Filter macro.
- Resolved the issue with the non-working date picker (opened by '/') with the latest version of the add-on.
