

Handy Timestamp

 This feature is available starting from the Handy Macros for Confluence 1.3.0.

About the feature

Task tracking in Confluence can be more informative if you know when exactly your tasks were changed or completed. You can quickly write down when you released a new software version or when you sent a contract to your customer with the simple Handy Timestamp macro.

Inserting Handy Timestamp

1. [Insert](#) the Handy Timestamp macro on the page.

2. Select the proper date and time format or enter it manually.

Insert 'Handy Timestamp' Macro

<p>Handy Timestamp macro for Confluence. Post Idea or Issue. Documentation</p> <p>Format (select or enter manually) *</p> <input type="text" value="dd.MM.yyyy HH:mm"/>	<p> Preview</p> <p>03.10.2019 13:44</p>
---	---

Select macro [Insert](#) [Cancel](#)

3. Select what the date and time to display:
 - Inserting the macro: when the Handy Timestamp macro is added to the page, the current timestamp
 - Publishing the page: when the page was published the first time
 - The last page update: when the page was last modified

- Inserting the macro
- Publishing the page
- The last page update

 **Preview**

17.09.2020 10:43

[Select macro](#) [Save](#)

1. Click **Insert**.

Supported date formats

Use the following symbols for configuring custom date and time formats:

String Value	Example
d - day of month (no leading zero)	1
dd - day of month (two digits)	01
M - month of year (no leading zero)	1
MM - month of year (two digits)	01
MMM - month name short	Jan
MMMM - month name long	January
yy - year (two digits)	19
yyyy - year (four digits)	2019
HH - hour in day (1-24)	14
hh - hour in am/pm (1-12)	02
mm - minute	01
ss - second	01

Using Handy Timestamp hotkey

You can quickly add the Handy Timestamp macro to the page by using the key combination. Press **Ctrl+Alt+T** combination when editing the page.

 You can disable this feature if you do not need it in your Confluence.

To disable this feature:

1. Navigate to **Confluence administration > Atlassian Marketplace > Manage add-ons**, then choose **Handy Macros**.
2. Expand the list of add-on modules.
3. Disable the **Insert Handy Timestamp Hotkey** module.
