# Customer Case - 6/11/2016

New in this release

Added output of forum types in forum switcher.

Now users can instantly see the support forums and feedback forums grouped by restriction levels - public or private.

The new version of add-on also includes the following feature:

- Added display of forums in alphabetical order in the forum switcher.
- Corrected behavior of opening the customer portal and set display of the first forum on the list instead of the first created forum in old versions of Customer Case.
