Table Filter and Charts 3.7.1

New in this release

The new version of add-on includes the following features:

- Improved the speed of loading pages with Table Filter, Pivot Table and Chart from Table macros.
- Updated the way of sorting columns of the table generated by the Pivot Table macro. Now data sorting is performed by the Total column.
- Added a capability to define filter width for the icon filter.

Fixed in this release

- Resolved the issue with applying the default column sorting to the table generated by the Pivot Table macro.
