

Table Filter and Charts 3.8.1

New in this release

The new version of add-on includes the following features:

- Added the automatic hiding of the color picker form when switching to another tab of the Insert/Edit Chart form or clicking the Select colors button.

Fixed in this release

- Resolved the issue with the display of incomplete set of filters when working with the table generated by the Page Properties Report macro and applied default sorting.
- Resolved the issue with showing 'undefined' when sorting the resulted pivot table received from multiple tables.
