

Coloring talks

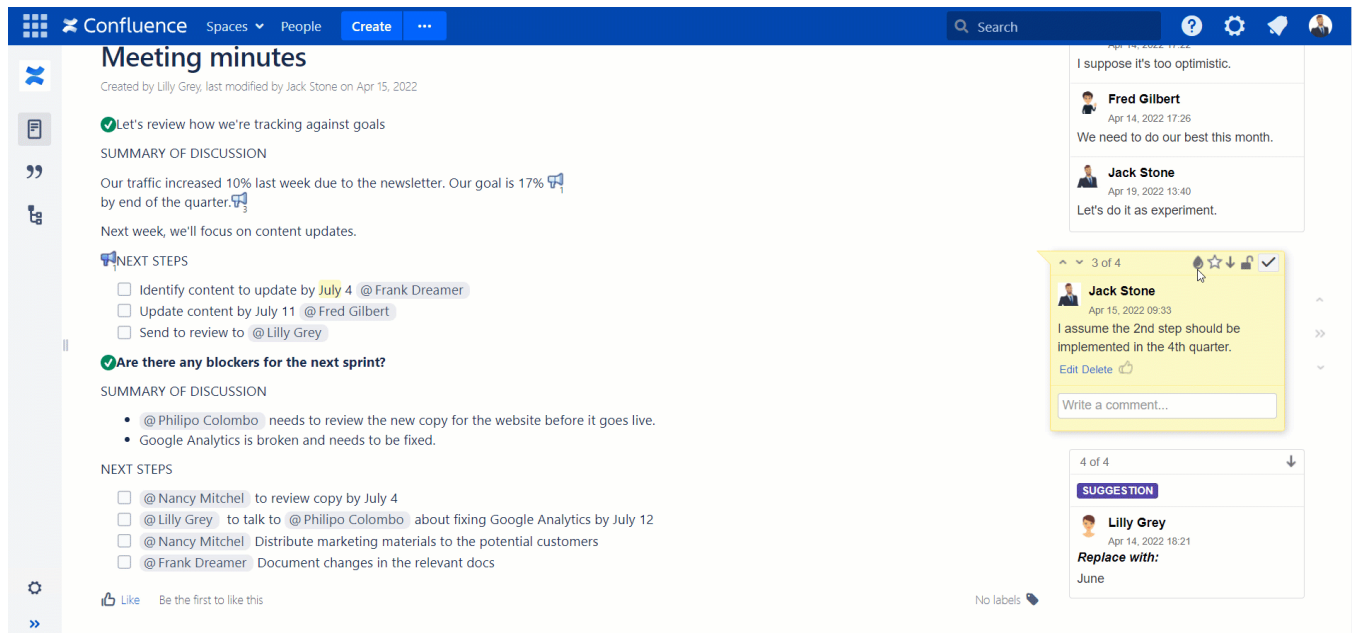

You can create a color convention for talks in the following use cases:

- prioritize discussions and suggestions
- assign colors to teams to distinguish discussions associated with each team (in case several teams work on the same document)
- distinguish topics of discussions
- bring some fun into your work 😊

You can find your own ways to use the coloring capability for the benefit of your team.

Besides coloring talks, you can also use [prioritizing Talk discussions and suggestions](#).

You can change the background color of your Talk inline comments and suggestions. To do that, click  and select one of the color options.

I assume the 2nd step should be implemented in the 4th quarter.
