Configuring Settings

TeamCity Integration for Confluence add-on allows you to configure the following settings:

- timeout for retrieving TeamCity data
- allow viewing build data for anonymous users

To configure add-on settings:

1. Navigate to Confluence administration.
2. In the **Configuration** section of the sidebar, locate **TeamCity Integration Configuration** and select it.

TeamCity Integration Configuration

Settings

TeamCity Data Retrieval Timeout (seconds)	**10**
☑ Allow Anonymous Access	

Edit

3. Click **Edit**.
4. Enter the timeout for TeamCity data retrieval in seconds.
5. Select the Allow Anonymous Access option.

ⓘ By default, anonymous access to build data is allowed.
