Table Filter and Charts 3.8.2

New in this release

Added support for icons when generating a pivot table.

Now you can summarize and aggregate any lind of table data with pivot tables.

The new version of add-on also includes the following features:

- Added a capability to export pivot tables to CSV.
- Added the automatic summation of number values for the same label when generating time or line charts.
- Improved performance of macros on large tables containing merged cells.
- Added support for the Profile List macro from Communardo.

Fixed in this release

- Resolved the issue with presence of ' ' in the exported CSV files.
- Resolved issue with the incorrect processing of tables containing multiple <tbody> tags or additional tags enclosed between <tbody> or <thead> tags.
- Resolved the issue with the chart hang-up when using the incorrect delimiter.
- Resolved the issue with showing no filters when previewing the page in Mozilla Firefox.
