

Smart Attachments 1.14.0

New in this release

Added a capability to **comment on attachments** in JIRA.

Now you can discuss individual attachments or attachment revisions in separate comment threads as it is possible in Confluence.

The screenshot shows the JIRA issue page for 'Design and Prototyping / DSGN-188'. The issue is in the 'IN PROGRESS' status. The 'Attachments' section is expanded, showing a list of attachments categorized by type: Media Assets (4), Source Files (1), Mockups (3), and Wireframes (2). A blue overlay box with white text reads 'Comment on attachments while browsing JIRA issues'. A context menu is open over the attachment 'website design example 3.jpg', showing options: 'Upload new revision', 'Comment on attachment', 'Rename', 'Send to email', 'Move to Source Files', 'Move to Mockups', 'Move to Wireframes', 'Move to Text Content', 'Move to Ready Design', and 'Move to Uncategorized'.

Attachment Name	Size	Created
website design example 1.jpg	355 kB	05/Sep/16 5:11 PM
website design example 2.jpg	194 kB	05/Sep/16 5:11 PM
website design example 3.jpg	1.21 MB	05/Sep/16 5:11 PM
website design example 4.jpg	49 kB	
source design file.psd	9.36 MB	
Design Concept 1 A	466 kB	
Design Concept 2.png	970 kB	
Design Concept 3.png	554 kB	
Website Structure.png	106 kB	
Website Structure.vsd	28 kB	

Use the wiki markup, mention JIRA users, view comments for specific attachment revisions and discuss documents without spamming issue comments.

The screenshot displays a JIRA interface with a design concept attachment titled "Design Concept 1 D.png - v.4 [Current]". The attachment is a website mockup with sections like "THINK BIG BUT MOVE FAST", "WE LOVE OUR CLIENTS", "CASE STUDIES", "AROUND THE WORLD", and "CONTACT". A blue text box is overlaid on the attachment, stating: "Discuss attachments in JIRA with separate comment threads and keep revision specific comments". To the right of the attachment is a comment thread with the following comments:

- Peter Jacobs**: Do you have any ideas about the recent revision? Do I need to add any updates?
Edit Delete Created - Today 5:21 PM
- Will Jefferson**: Peter Jacobs, please add a small section with examples of our recent projects.
Edit Delete Created - Today 5:23 PM
- Peter Jacobs**: Done! Please check.
Edit Delete Created - Today 5:24 PM
- Ashley Stone**: Looks nice! 😊 Great work!
Edit Delete Updated - Today 5:26 PM

A reply box is open for the comment by Ashley Stone, containing the text: "[~pjacobs], did you discuss the template complexity with the dev team? Are you going to use parallax?". The reply box has "Reply" and "Cancel" buttons. Below the reply box, there are more comments from Ashley Stone and Will Jefferson, each with a "3" in a circle indicating more comments. At the bottom of the comment thread is a button labeled "New comment thread".

The new version of add-on also includes the following features:

- Added validation of special symbols when renaming attachments in JIRA.
- Extended the set of events collected by Google Analytics.
