# TeamCity Integration for JIRA 2.5.0

## New in this release

**Improved the way of creating application links to TeamCity servers.**

Now you can much more quickly create application links to TeamCity servers.

**Improved the display of multi-level projects when filtering builds, configuring gadgets and custom fields.**

Now you can better navigate across multi-level projects and select only the ones you need.

**Better navigate across multi-level TeamCity projects**

## Fixed in this release

- Resolved the issue with the persistent display of the message about the ongoing indexation when there are no builds on TeamCity server.
- Corrected the mechanism of caching related builds and resolved the issue with the incorrect parsing of issue keys after modifications on TeamCity servers.
