

Smart Attachments 1.15.0

New in this release

Added support for **GoEdit - Direct Attachment Edit for JIRA** add-on.

Now you can quickly edit all kinds of attachments on your local computer and keep their specific revisions in JIRA in the organized tree.

The screenshot displays the JIRA Attachments interface. It shows a list of attachments organized into categories: Media Assets (4 items), Source Files (2 items), Mockups (3 items), and Wireframes (2 items). A callout box points to the 'source design file.psd' attachment in the Source Files category, with the text 'Edit attachments directly from JIRA'. Another callout box points to the same attachment, stating 'Keep file revisions within the document'. A third callout box points to the 'source design file.psd' attachment, with the text 'Edit attachment directly'.

Category	Attachment Name	Size	Time
Media Assets (4)	website design example 1.jpg	355 kB	05/Sep/16 5:11 PM
	website design example 2.jpg	194 kB	05/Sep/16 5:11 PM
	website design example 3.jpg	1.21 MB	05/Sep/16 5:11 PM
	website design example 4.jpg	49 kB	05/Sep/16 5:11 PM
Source Files (2)	favicon.ai	1.55 MB	3 minutes ago
	source design file.psd	12.00 MB	4 days ago
	source design file.psd	12.00 MB	4 days ago
	source design file.psd	10.39 MB	27/Dec/16 10:26 AM
	source design file.psd	11.12 MB	26/Dec/16 2:30 PM
Mockups (3)	Design Concept 1 A	466 kB	05/Sep/16 4:18 PM
	Design Concept 2.png	970 kB	05/Sep/16 4:33 PM
	Design Concept 3.png	554 kB	05/Sep/16 4:33 PM
Wireframes (2)	Website Structure.png	106 kB	03/Oct/16 11:00 AM
	Website Structure.vsd	28 kB	03/Oct/16 11:00 AM

The new release also includes the following feature:.

- Added the libraries for generating preview of PDF files on JIRA 6.x versions.

Fixed in this release

- Resolved the issue with API request allowing creation of categories with identical names within the same project.
- Resolved the issue with the incomplete removal of documents containing two revisions.
- Resolved the issue with the inactive Attachments icon on the issue sidebar in the Scrum/Kanban board views.
- Resolved the issue with the incorrect upload of attachments to a specific category when searching for issues.
- Resolved the issue with the non-clickable Attachments section when viewing the issue details on the Scrum/Kanban boards.
- Resolved the markup issue with the incorrect positioning of the dropdown box for selecting the bulk operation.
- Corrected the mechanism of sending emails with attachments from JIRA.
