Table Filter and Charts 3.9.3

New in this release

The new version of add-on includes the following features:

- Improved the performance of the Pivot Table macro when aggregating the large table with icons.
- Corrected behavior of the Chart from Table macro so now it does not process the filtered values and the Total column from the pivot table.

Fixed in this release

- Resolved the issue with the opening of the URL with filtration results when values for filtration contain commas.
