

Table Filter and Charts 3.9.4

New in this release

The new version of add-on includes the following feature:

- Added support for Forms Inline Editor add-on.
- Improved the way of generating pivot tables on the basis of the table cells with images and text values.

Fixed in this release

- Resolved the issue with the incorrect generation of the column/bar charts on the basis of multiple table columns with values if values in some cells are not available.
- Resolved the issue with the corruption of the filtered table when exporting it through the standard Confluence mechanism.
- Resolved the issue with export of the table generated by the Page Properties Report macro with the enabled options of showing count of comments and likes.
- Resolved the issue with allocation of the page area for the control pane of the pivot table event when the pane is disabled.
- Resolved the issue with the non-working URL with pre-defined filtration results when using it with dynamically updated tables.
