

Annotations for Confluence

Overview

Annotations for Confluence is the app that allows you to find out the author of any piece of text.

Any Feedback?

We are happy to help you. If you have any suggestions you can always:

[Add your idea](#)

[Vote for existing ideas](#)

or just [email us!](#)

How to use the app

1. Select the text.
2. Click the Annotate icon within the inline dialog.

- Organize page structure with interactive statuses
- See the history of your last visit in one click
- Remind your colleagues of important things, tasks and scheduled events via email
- Visualize your content with clickable Confluence-style buttons instead of traditional links

3. Here you are!

[designed to make](#) your Confluence content more comfortable to read and interact with.

Roman Kirilenko made changes on **Aug 30, 2016 09:02** in **revision 190**

4. Hover over the **changes** link to see the diff inline or click the link to open a regular diff.

[designed to make](#) your Confluence content more comfortable to read and interact with.

Roman Kirilenko made changes on **Aug 30, 2016 09:02** in **revision 190**

| | |
|---|--|
| Add-on name (40 characters or less) 27 | Handy Macros for Confluence |
| Summary (250 chars) 249 | Take Confluence experience to the next level with handy dynamic elements. Set reminders to remember about planned activities. Track your progress. |

5. Click the **revision number** link to see the page revision to learn where the changes come from.

[designed to make](#) your Confluence content more comfortable to read and interact with.

Roman Kirilenko made changes on **Aug 30, 2016 09:02** in **revision 190**

Known limitations

You can use Annotations only with the text.
