Table Filter and Charts 3.9.11

Fixed in this release

- Resolved the issue with the sorting of the table generated by the Page Properties Report macro with the enabled Fit table to screen area option.
- Resolved the issue with the incorrect calculation of the chart width when the Chart from Table macro is placed within the Expand macro or on the inactive tab.
- Resolved the issue with the export of the hidden table rows to a Word file when these rows become visible in the exported file.
