

Talk for Confluence 3.3.6

New in this release

- Added the capability to enable the 'Insert Talk Macro' button in the Confluence editor toolbar. [Learn more](#)
- Improved the behavior of the keyboard shortcut for inserting talks in the editor – Ctrl+Alt+C (⌘+Alt+C for macOS users). Now when applied to the selected text, that text is not being replaced by the Talk macro. Instead, the Talk macro is added at the end of the selected text.
