TeamCity Integration 5/1/2017

New in this release

The new version of add-on includes the following features:

- Improved behavior of the add-on during re-installation or uninstallation when the user's data is not instantly removed but kept for one month (instead of the complete removal prior to this release).

Fixed in this release

- Resolved the issue with showing the incorrect percentage of indexation progress when running re-indexation of build data.
- Disabled display of the TeamCity tab in JIRA Core projects.
- Resolved the issue with indexation of build data when database is temporarily disconnected.
- Resolved the issue with an ability to add multiple TeamCity servers with the identical host address.
