

# Handy Macros for Confluence 1.8.0

## New in this release

- Added the [Handy Social Button](#) macro. This macro allows you to quickly share the link via Twitter, Facebook, and LinkedIn.

- Added the [Handy Heading](#) feature. It allows you to copy a link to any heading on the page into clipboard in one click.

- Added a capability to map the Handy Status macro to page labels.
- Added the automatic resizing of image carousels or galleries upon changing the browser size or collapsing/expanding the navigational sidebar.
- The corresponding reminder is now highlighted after clicking its link from email.

## Fixed in this release

- Minor issues with [Talk](#) add-on.
- The Handy Date feature doesn't work within comments.
- Handy Page Diff shows "-1" after deleting one of historical revisions of the page.
- The Handy Status macros may be switched together after copying in some cases.
- The Handy Status macro didn't show history if the macro is placed into the table header.
- The status selection form remains open after selecting a new status if the macro is placed into the table header.
- Improved performance for pages containing a large number of Handy Status macros.
