

Contiguity / Barcode chart (use case)

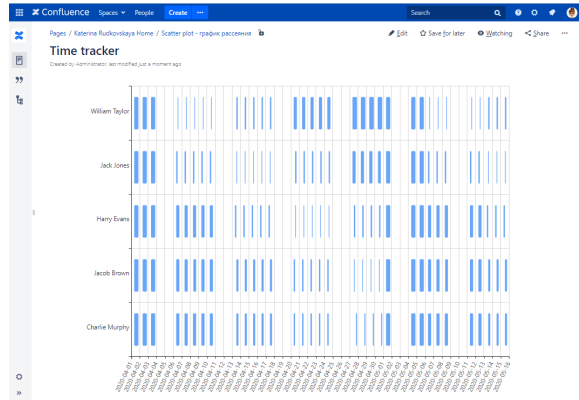

You can build a Contiguity or Barcode chart with the help of the [Gantt chart type](#)

Use Case:

You have a table with columns containing names of employees, the start and the end of working hours for six weeks.

You are going to build a chart with time ranges of working hours shown according to an employee's name day by day.

Solution:

1. Wrap the table with the Chart from Table macro.
2. Choose the [Gantt](#) Chart type.
3. Set needed Labels, Values column(s) in the chart controls.
4. Specify the correct Date format and other options if needed.
