

Punchcard (use case)

 You can build a Punchcard with the help of the [Bubble Pie chart type](#).

Use Case:

The table includes information on the number of commits by day of the week and hour.

You need to get a commit summary with the help of a Punchcard.

Solution:

1. Wrap the table with the Chart from Table macro.
2. Choose the [Bubble Pie chart type](#).
3. Set X-axis and Y-axis columns, values column in the chart controls.
4. Specify the correct Date format and other options if needed.
