

Table Filter and Charts 3.11.7

Fixed in this release

- Resolved an occasional issue with not working filters with Page Properties Report macro on Confluence 5.9.
- Resolved the issue with not populating dropdown filter options with @currentUser when using user mentions and rows numbering.
- Resolved the issue with not showing Table Filter macro of the included copy of page.
- Resolved the issue with axis ticks precision in Chart from Table macro when using fractional scale step.
