

TeamCity Integration 9/19/2017

New in this release

The new version of add-on includes the following features:

- Changed the direction of image scrolling in the carousel on the TeamCity Servers page after the initial add-on installation.
- Disabled display of the TeamCity tab in Business projects (provided by JIRA Core).

Fixed in this release

- Corrected the behavior of continuous data polling in JIRA when there are no configured TeamCity servers.
- Disabled a capability to register a new TeamCity server if the TeamCity server with the current URL has been already registered.
