

TeamCity Integration for Jira 2.6.3

New in this release

The new version of add-on includes the following features:

- Updated the link in the Getting Started form which is displayed after installation or update of the app. Now it points to the TeamCity Servers section.
- Added the Reset all filters link which is displayed after filtration of builds if no builds matching the filtration criteria are found.

Fixed in this release

- Resolved the issue with writing a warning into JIRA log file upon opening the dashboard with the Activity Stream gadget.
