Table Filter and Charts 11/09/2017
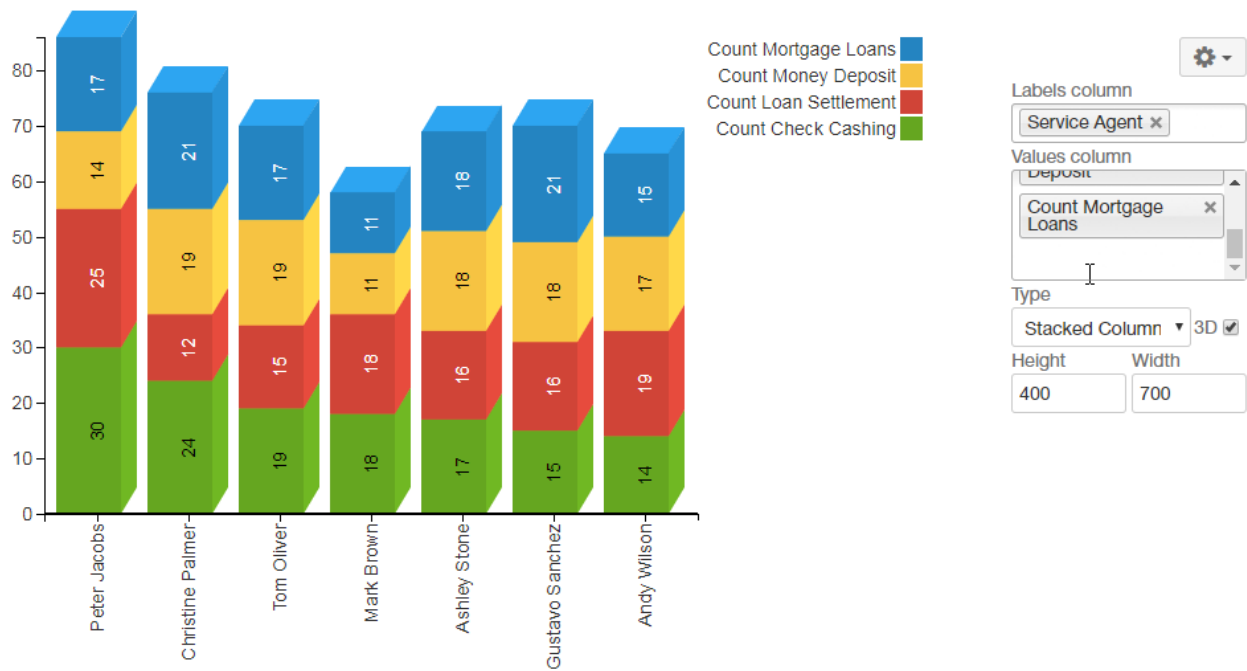

New in this release

Added an option to build 3D pie, column and bar charts (including their stacked variants).

Now you can visualize your table data with new 3D charts.

Added a capability to aggregate numerical data, worklogs and time periods against the specific value ranges.

Now you can instantly count entries within each pre-defined value range.

Added a new operation type 'Literal'.

Now you can find all the unique values within the defined range of values and aggregate them against the specific labels.

Literal Operation
