Talk for Confluence 1.7.2

StiltSoft is happy to announce the release of Talk for Confluence 1.7.2

What's new

Fixed compatibility with Team Calendars.

Fixed Bugs

- When using Team Calendars on a page it was impossible to add new reply to the existing 'Talk'. Focus of discussion was lost almost right after clicking on it.
- Weird javascript alerts can be shown when you are using hot-keys in comment editor on the page which contains Talk discussion.
