

Talk for Confluence 1.6.0

StiltSoft is happy to announce the release of Talk for Confluence 1.6.0

What's new

Talk was localized into German, Spanish and Russian.

- This version contains localization of the plugin into the German, Spanish and Russian languages.
- Talk Plugin is now fully compatible with the Include macro. For example, you can manage discussions from an included page on the main page.
- Now you can remove focus from a discussion when clicking out of it.

Fixed Bugs

- When using the Blog Posts macro with the previous version of the plugin you may have got an error message instead of a Talk discussion on such a page.
