

# Smart Attachments 1.18.0

 Since this version Smart Attachments app does not support Jira 6.x.

## New in this release

Added a new type of **conditions** and **validators** - **Verify Number of Attachments in Category**.

Now you can check the number of files stored in category or the number of attachments matching a specific name pattern before allowing transition of the issue to the next status.

Update parameters of the 'Verify Number of Attachments in Category' Validator for this transition.

Update parameters of the 'Verify Number of Attachments in Category' Validator for this transition.

 You can enter multiple name patterns using the comma. The validator will verify the number of attachments in the specific category.

Category: Documents

Limit numbers of files: ≥ 3

Treat document revisions as distinct attachments: ☐

Files to check:

- ☐ Any file
- ☒ Files matching name pattern
- ☐ Files matching regular expression

docx, pdf

Update Cancel

**COMPREHENSIVE VALIDATION CRITERIA**

Adjust the validation criteria to your needs and check the number of attachments in the specific category during the issue transition.

Added a capability to map the **app specific events** to the native JIRA events.

Now you can automate some actions when app fires specific events after operations on attachments.

- Events**

### Attachment Action Events

Here you can map the app specific events to the generic Jira events. Further, you can catch information about attachments or perform automatic operations on them.

Attachment placed into category	Attachment into Category
New document revision added	New Document Revision
Attachment renamed	File Renaming

Save Cancel

**CUSTOM EVENT FIRING**

Map the app specific events to generic Jira event, catch them and use for performing automated operations.

## Fixed in this release

- Resolved the issue with showing long attachment names in the file upload and transition forms.
