

# TeamCity Integration for Jira 2.7.0

## New in this release

**Updated the look of the TeamCity Build Configurations gadget.**

Now the TeamCity Build Configurations gadget shows builds from different branches that are managed by the specific build configuration. You can also select the appropriate branch when you trigger a new build from the gadget.

**UPDATED LOOK OF GADGET**

View builds from branches that are managed by selected build configurations or trigger builds in specific branch on the fly.

**Option to select the appropriate branch when triggering a new build.**

Now you can select the appropriate branch when triggering a new build through the [TeamCity Build Runner](#) field.

Trigger build

✕

You are going to trigger a custom build from the "TeamCity » TeamCity Integration for JIRA Server » branches" configuration. Do you want to proceed?

The build will run with following parameters:

Branch: 

2.7.x ▾

Active

<Default>

2.7.x

Inactive

1.7.2.kerio

1.7.3

1.7.4-intel

1.8.0

1.8.0.dk

2.0.2

2.0.3

2.0.4

2.0.6-SNAPSHOT

2.1.0

2.2.0

2.3.x

2.4.2

2.4.x

2.5.0

2.5.1
